**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The action mailed 3/23/07 is in error, the instant action replaces it.

The declaration of P. Cheng, filed 2/13/07 has been considered but is deemed insufficient to overcome the 103 rejection filed 10/26/06 because swearing behind a reference requires a declaration by all the inventors. See MPEP 715.04.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1, 2, 5-7, 9, 11, 27 rejected under 35 U.S.C. 103(a) as being unpatentable over Eury (US Patent 5,443,458) in view of WO01/07066 (WO '066).

Eury teaches a multilayered stent (abstract). Polycaprolactone is disclosed (column 2 lines 56-67). An outer layer containing drugs that address restenosis is disclosed (column 4 lines 52-54).

WO '066 teaches a method of treating vascular disease (abstract). Treating restenosis is specified (page 3 lines 21-22). Rosiglitazone is disclosed (page 22 line 34-page 23 line 6).

It would have been obvious to one of ordinary skill to add rosiglitazone to the device of Eury to achieve the beneficial effect of treating restenosis in view of Wo '066.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1616

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5-6, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Dayton.

Dayton teaches a stent coated with a polymer containing a bioactive such as ibuprofen (abstract). Polylactic acid polymers are specified (column 4 lines 13-14). Seed et al is cited as extrinsic evidence that ibuprofen is a PPARgamma agonist (column 5 lines 60-64).

No claims allowed.
